#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

This office action is in response to request for continued examination and remarks filed on December 22, 2006. Original application contained Claims 1-5. Applicant previously submitted a preliminary amendment canceling original Claims and adding new claims 6-25. Applicant previously amended Claims 1, 11, 16, and 21. Applicant currently amended Claims 1, 11, 16, and 21. The amendment filed have been entered and made of record. Presently pending claims are 6-25.

#### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 22, 2006 has been entered.

#### ***Response to Arguments***

Applicant's arguments filed on December 22, 2006 have been fully considered but are moot in view of the new ground(s) of rejection.

### ***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 6-25 of instant application 10/712,190 (hereafter '190) are rejected on the ground of nonstatutory double patenting over claims 1-6 of U. S. Patent No. 6,052,788 (hereafter '788) since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Claims 6-25 of instant application '190 are rejected under the judicially created doctrine of obviousness-double patenting as being unpatentable over claims 1-6 of '788. Although the conflicting claims are not identical, they are not patentably distinct from each other because in view of the obviousness type double patenting rationale enunciated in **Georgia-Pacific Corp. v. United States Gypsum Co.**, 195 F.3d 1322, 1326, 52 USPQ2d 1590, 1593 (Fed. Cir. 1999), both application claim subject matter that relates to computer network security that selectively

allows acceptable computer transmissions to pass through it and disallows other non-acceptable computer transmissions (i.e. acting as firewalls), and the instant application's '190 above mentioned claims merely define a multi-homing firewall (i.e. at least one sets of virtual hosts running on a single physical machine) firewall, using multiple network addresses on a single network interface, where a virtual host assumes the identity of one of multiple, independently-configurable "homes" to handle a particular connection at a particular time and utilize domain name server to facilitate a connection between the networks, which is a obvious variation of firewall nodes delineating one network segment from another network segment and establishing a communication link using dynamic DNS services of the invention as claimed in patent '788.

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Syed Zia whose telephone number is 571-272-3798. The examiner can normally be reached on 9:00 to 5:00.
